Afternoon activity:

We are going to spend some time learning, and talking about, **biomes**. A **biome** is an environment where the **plants and animals in the area are adapted to live there**. Look at the pictures below. What do the animals have in common? Where might they live?

All of these animals are adapted to live in a **savanna**. A savanna is a biome which is grassy, hot and dry (with no rainfall at all from December to February!) during winter and hot and wet during summer.

Most of the world's savannas are in Africa. Many tourists go on holiday to countries like Tanzania and go on safari – an experience where you explore the savannas by car and spot beautiful animals.

If you **have access to the internet**, spend some time researching **one animal** that lives in a savanna and write a fact file or create a poster about it.

If you **don't have access to the internet**, visit the library if you can (they are open again from the 4th July) and take out a few books about different animals and their habitats as you will need them for topic this week.

camel

scorpion

Arabian oryx

sidewinder snake

All of these animals are adapted to live in a **desert**. A desert is the hottest biome: it is covered in sand, it rarely rains, and very little things grow here.

The biggest hot desert is called the Sahara Desert, in Africa. However, deserts can also be cold. Can you think of any similarities between a **tundra** and a **desert**? Although they have a different **climate**, they are very similar.

If you **have access to the internet**, spend some time researching **one animal** that lives in a desert and write a fact file or create a poster about it.

Hopefully you have visited the library if you **don't have access to the internet** and you have a book about deserts, or animals that live in extremely hot conditions. Spend some time reading this book and write a fact file or create a poster about one animal you find the most interesting.

The largest rainforest in the world is the **Amazon Rainforest**, in South America. However, there are rainforests on every continent except Antarctica.

If you **have access to the internet**, spend some time researching **one animal** that lives in a rainforest and write a fact file or create a poster about it.

Hopefully you have visited the library if you **don't have access to the internet** and you have a book about rainforests. Spend some time reading this book and write a fact file or create a poster about one animal you find the most interesting.
